

Oakwood Avenue Bridge Replacement City of Napoleon

Project Name: Oakwood Avenue/County Road 13A Bridge Replacement (6368)

Community: Henry County, City of Napoleon

Project Description: The replacement and widening of the existing bridge along Oakwood Avenue in Napoleon will restore legal load limits to the structure, allowing for larger vehicles and trucks to use this potential hauling route.

Project Sponsor: Henry County Engineer

Community Economic Distress Factors: Henry County has a high unemployment rate at 7.15% with a per-capita average income \$29,462.

Economic Development Potential: By increasing the weight limits on this bridge to updated and standard legal limits and by increasing the width of the lanes 2 feet in each direction, this roadway will allow greater access for the movement of freight in Napoleon and Henry County.

Multi-modal Connectivity/Innovation Factor: By restoring legal load limits and widening the lanes, the project will improve the flow of local commerce and offer a safe, reliable route for travel.

Work to Begin: 90 – 180 days

Estimated Completion: 3 Months

Stimulus Investment: \$400,000

Total Project Cost: \$554,494
