

## SR 741 and Austin Pike Improvements Montgomery County

**Project Name** (8876): SR 741 and Austin Pike Intersection Improvement (18945 Gov ID)

**Community** (County/City): Montgomery County

**Project Description:** This project will complete the construction of the "Continuous Flow Intersection" (CFI) at SR 741 and Austin Pike, and will be incorporated into the Austin Pike Interchange project at I-75. A CFI is a unique and innovative way to move large volumes of traffic efficiently but without costly grade separation structures. The Austin Pike/I-75 interchange project contains two of the four legs of the CFI construction, on Austin Pike. This project will add the other two legs of the CFI on SR 741.

**Project Sponsor:** Montgomery County Transportation Improvement District

**Community Economic Distress Factors:** Montgomery County jobless rate is 11.2%

**Economic Development Potential:** This project will add 24 construction jobs. The intersection of SR 741 and Austin Pike is a part of the many improvements being made to the transportation network in this area, with the potential of new development and thousands of additional jobs created over time.

**Multi-modal Connectivity/Innovation Factor:** This project adds capacity, reduces congestion, increases mobility, and provides better connectivity to the various development projects expected to come into the region.

**Work to Begin:** Summer 2009

**Estimated Completion:** 12 months after project commencement

**Stimulus Investment:** \$2,000,000

**Total Project Cost:** \$7,260,000
