209 Linear Grading

1. Specification:

Item 203.02.R C&MS

Item 617 C&MS

2. Sampling and/or Testing Requirements:

Soil, embankment or granular embankment material shall conform to the appropriate sections of Item 703.16. Refer to Item 203.03 for material restrictions.

Construct embankment and subgrade according the Items 203 and 204. Grading should not encroach on stream channels, impact wetlands and should not extend beyond construction, Right-of-Way or easement limits. Tolerances are listed in Item 203.08.

Compaction testing of subgrade according to Supplement 1015 may be checked before or after fine grading operation.

3. Method of Tests:

Supplement 1015
