

## S 1073 – PRECAST CONCRETE BULLETIN QUESTIONS

This 'Bulletin System' is being put into place in order to provide consistent communication on FAQs, issues or decisions that affect everyone. If you have a question about specification requirements or an issue with an inspector's interpretation of a specification, let us know. We'll make a decision and post it on our website. That way the decision is available for all plants and inspectors to follow – consistently. The way that it works is:

- If you have an issue that you want an answer to, e-mail this office at [ODOT-S1073precast@dot.state.oh.us](mailto:ODOT-S1073precast@dot.state.oh.us).
  - Please be as specific as you can with your questions. Include your reasoning for the question, references to specifications or NPCA requirements and pictures that you can in order to back-up your position on the issue.
  - The issue can be submitted on behalf of a single plant or by the industry.
  - We may also have concerns that we feel may be happening in multiple plants. We will bring up those concerns or issues under 'GENERAL' topics.
  - Submit your question at any time.
- The questions will not be answered immediately, but will be accumulated and answered on a quarterly basis
  - If you need an immediate answer to an urgent problem, contact an inspector or this office for an immediate answer. You may also want to submit it for the bulletin as well so that all plants will be held to the same standard as you.
  - Some questions may require dealing with another Office in order to get clarification of the requirements or to change a specification.
- We will post the questions and answers on our website.
  - You will receive a notice by e-mail letting you know when a new Bulletin has been issued
- If you do not agree with or are not clear on a decision that is made, feel free to ask for reconsideration or clarification.
  - Provide pertinent information to back-up your request.
