

Caulking Compound for Field Paint

Qualified Product List Specification - Requirements

ODOT Construction and Materials 514.02

Requirements for inclusion on the Qualified Product List

Submit to the Office of Materials Management the following information:

1. Manufacturer's letter certifying the Caulking Compound supplied to the project will meet or exceed Departmental specifications as follows:
 - A. Indicate the caulking material is a single pack moisture cured polyurethane based material, which will not shrink or sag, capable of filling voids greater than 1/8 inch (3mm) and up to 1 inch (25mm) wide.
 - B. Show typical markings on the packaging and any date markings.
 - C. Provide application instructions and temperature limitations on a 30 minute field set.
 - D. State effective product life
 - E. Agree to immediately notify the Department on any changes in production, materials, dimensions before shipment.
2. Provide the Department a contact name, number and e-mail address
3. Provide re-certification documentation by January 1st of each year.

Acceptance by the Department

The Office of Materials Management will review the manufacturer's submittal for compliance with specification requirements.

Accepted products will be listed on the Department's QPL (qualified product list) web page and recorded in the Construction Management System for acceptance in the field through the QPL screen.

Field Documentation requirements

Products on the QPL will be accepted if they can be identified in the field by manufacturer name and (in applicable) brand name.
