

## Soluble Reactive Silicate

### Qualified Product List

### Specification - Requirements

ODOT Construction and Materials Specifications 705.24 (SS 841 in 2002)

### Requirements for inclusion on the Qualified Product List

#### Submit to the Office of Materials Management the following information:

1. Manufacturer's letter certifying the soluble reactive silicate treatment supplied to the project will meet or exceed Departmental specifications and include:
  - A Include certified test data showing compliance with specification requirements
  - B Pictures of typical markings for containers and any date codes that effect the effectiveness of the product
  - C Provide application rates and final total application gallon/sq foot requirements.
  - D Provide methods of application
  - E Effective product life
  - F Provide a 1 quart sample and TDS and MSDS
2. Provide the Department a contact name, number and e-mail address
3. Agreement to immediately notify the Department on any changes in production, materials, dimensions, before shipment
4. Provide re-certification documentation by January 1 of each year

#### Acceptance by the Department

The Office of Materials Management will review a manufacturer's submittal for compliance with specification requirements and will evaluate any pre-qualification samples.

Accepted products will be listed on the Department's qualified product list web page and will be loaded into the Department's Construction Management System for acceptance in the field through the QPL screen.

#### Field Documentation requirements

Products on the QPL will be accepted if they can be identified by the field to a supplier/manufacturer listed on the Department's Qualified Products List.
