

Geogrid
Qualified Product List

Specification - Requirements

ODOT Construction and Materials Supplemental Specifications 861

Requirements for Inclusion on the Qualified Product List

Submit to the Office of Geotechnical Engineering the following information:

- 1) A manufacturer's letter certifying the geogrid material supplied to the project will meet or exceed Departmental Supplemental Specification 861 and include:
 - a. Marking identification method so field personnel can identify product with manufacturer. This can include electronic picture format. Provide multiple samples/pictures if typical markings are different.
 - b. Certified test data showing compliance with Table 861.02-1
2. Agreement to immediately notify the Department of any changes in production, materials and/or dimensions before shipment.
3. A contact name, number and e-mail address.
4. Re-certification documentation by January 31 of each year.

Acceptance by the Department

The Office of Geotechnical Engineering will review a manufacturer's submittal for compliance with specification requirements and will notify the Office of Material Management as to the acceptance of the product submittal.

Accepted products will be listed on the Department's Qualified Product List (QPL) web page and will be loaded into the Department's Construction Management System for acceptance in the field through the QPL screen.

Any quality assurance field samples found to not meet specifications will mean removal of the supplier/manufacturer from the Qualified Products Lists.

Field Documentation Requirements

Products on the QPL will be accepted if they can be identified in the field to a supplier/manufacturer listed on the Department's Qualified Products List.
