Low Profile Tapered RPM with 1 way Yellow Reflectors	RRPM 12				
High Profile Conventional RPM with White/White Reflectors	RRPM 13				
Low Profile Tapered RPM with White/White Reflectors	RRPM 14				

	<p>The ODOT Sign Shop will load RPMs onto trucks similar to the ones shown on this page. The Sign Shop personnel have the final say in whether a truck can be safely loaded and how it will be loaded at the dock.</p>
	<p>NOTE: A loading dock is not available. Fork lift operator will only place the pallets on the tail gate of the truck or trailer. It is the responsibility of the Contractor's driver to move and arrange the pallets on the truck or trailer.</p>
	<p>The driver of the truck being loaded will assure that the RPMs are loaded so they constitute a safe legal load. ODOT will not load tilt bodies, dump trucks or noncommercial moving vans.</p> <p>Trucks that cannot safely carry the required load will be turned away. If the Contractor does not follow these procedures, and ODOT cannot load the RPMs, the Contractor will be responsible for loading the RPMs. Any damage during transport is the Contractor's responsibility.</p>
