

PN 461 – 7/21/2006 - Night Paving using Material Transfer Device

In addition to the requirements of 401.12 use a material transfer device (MTD) for all of the surface course mainline paving. Use an MTD capable of remixing and transferring the asphalt mixture from the MTD to the asphalt spreading equipment.

Designer Note

Only use this note for night paving projects over 1 lane mile in length and where the designer and District have determined an MTD can be used.

Questions regarding this note should be directed to:

Julia Miller - Office of Construction Administration (614-644-6622)

Dave Powers - Office of Materials Management (614-275-1387)
