Re: Design Build Scope and Design Build Manual

---

ODOT's standard Design Build (DB) Scope has been revised to address various minor updates and clarifications, including:

- DB Scope, Section 8.5 – Renamed Post-Award Meeting to Post-Letting Meeting and modified requirements.
- DB Scope, Section 19 – Clarification on when Buildable Units may be used.

These revisions do not significantly alter current DB procedures, and can therefore be implemented on all current projects; effective immediately.

The revised scope and manual may be obtained from [http://www.dot.state.oh.us/Divisions/ProdMgt/Production/design-build/Pages/Design\\_Build\\_Revision\\_History.aspx](http://www.dot.state.oh.us/Divisions/ProdMgt/Production/design-build/Pages/Design_Build_Revision_History.aspx). Revisions are shown in red text.

Additional design and construction information is available from the ODOT Design Reference Resource Center (<http://www.dot.state.oh.us/drrc/>). The DRRC site can also be used to sign up for mailing lists for additional ODOT publications.

The current Design Build Scope and Design Build Manual apply to ODOT's one-step (low bid) DB process. ODOT is currently developing a value based selection process for use on an extremely limited number of projects.

We welcome any comments or suggestions you may have regarding the Design Build process. Please address any concerns to:

Ohio Department of Transportation, Office of Production
