Question Number: 3

Specification Section 108.01 requires the prime contractor to perform contract items of work amounting to 50 percent of the contract. However, this project has a considerable amount of structural steel painting and hydrodolition. These items of work are performed specially subcontractors. With this in mind, we request that the amount of work performed by the prime contractor be changed to 35 percent.

Question Submitted: 8/9/2007

Question Number: 4

Will the department pay for barrier wall to be set and used during the parapet rehabilitation on the Clermont county bridge that is to be overlayed. A few approximately 10' long holes will be had in the parapet and it is not possible to demo, form, and pour each section in one day; therefore blunt ends and holes in the parapet wall will cause a safety hazard to the traveling public.

See the plan note "Parapet Openings and Painting Equipment" on sheet 3/11.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
