

# Ohio Department of Transportation - Prebid Questions

Project No. 100489

Sale Date - 9/16/2010

COL-81649 - LR-SILLIMAN STREET

*Question Submitted:* 9/15/2010 3:35:39 PM

Regarding the previous question and reply to the in-stream work, the question remains, will the District allow equipment in the stream to complete the work? Furthermore, we do not agree with the reply provided. ODOT's response is not consistent with what the special provisions state or imply. The previous questions submitted were clear and need clarification. Also, does the Department or District know of any potential hazardous materials in the stream bed that may be disturbed during construction of the abutment footings? It is fairly obvious that cofferdams and work in the stream will have to take place to excavate and place the new abutment footings. Finally, with the issuance of addendum number 3, per the current ORC, the project bid date shall be extended when such addendas are issued within 72 hours of the bid date.

*Question Submitted:* 9/14/2010 3:22:10 PM

Please clarify if contractors equipment can be placed in the stream to complete proposed work. Please clarify that the Department anticipates the contractor to hire an Engineer to submit a plan to the Corp of Engineers for their in- stream work associated with the new abutment footings below normal water level. If an Engineered submittal is required, please add appropriate bid item.

*Question Submitted:* 9/11/2010 5:05:00 PM

Sheets 18,23, and 26 show Rock Channel Protection Typ. C with filter. There is no quantity for this item included with the estimated quantities. There are not any notes about including the cost of rock channel protection with any other bid item. Please advise. Thank you.

*Question Submitted:* 9/7/2010 4:08:18 PM

It appears that the bid item for elastomeric bearings on page 20/33 is different than what is shown in the details on page 29/33. Please advise which description is correct?

(8.5" x 8.5" x 1.5"= bid or 6" x 6" x 1.152" = detailed)

*Question Submitted:* 9/6/2010 8:38:12 PM

In reference to general note "Contractor's Equipment - Operation and Storage" on page 7/33, please explain the purpose and intent of the last paragraph.

**An addendum is forthcoming.**
