## Prebid Questions

Project No. 050522

Sale Date - 11/2/2005

---

Question Submitted: 10/10/2005

Question Number: 1

Plan sheets 63-68 all show a note stating "cut and fill volumes have been inflated by a factor of 27% to account for swell and shrinkage of the soil". Sample hand takeoffs on the cross-sections calculate accurately the end areas given. Where does this 27% come from and how exactly will ODOT measure for payment? This 27% factor on 5110 cy of embankment is 1380 cy. Can ODOT please better clarify this note?

Question Submitted: 10/11/2005

Question Number: 2

Reference 57 & 58 Rigid Replacement is to be done under a 7 day closure is using Class C Concrete per bid items going to allow enough cure time or should bid item be Class MS or Class FS?

---

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
