Prebid Questions

Project No. 050209

Sale Date - 4/6/2005

Question Submitted: 3/17/2005

Question Number: 1

Ref. 8 Item 606 Guardrail Misc. Type 5 25' Long Span Cor-ten Weathering Steel 50 LF & Ref. 29 Item 517 Railing(Twin Steel Tube) 140 Lf.

The notes on page 6/20 call for the material to be A588 weathering steel. The tubing is not available in weathering steel. The closest thing to the size available is 1/4" thick wall tubing. Another problem is that material in this small quantity is not available in DWT and will not meet ODOT Specs. 707.10

Question Submitted: 3/17/2005

Question Number: 2

As a follow-up question on reference no. 29 - How do you attach the twin tube to the structure? No details are given. Is there existing bridge railing to be removed?

Question Submitted: 3/17/2005

Question Number: 3

I have been told that reference no. 29 twin tube railing is not available in cor-ten in such a small quantity and meeting ODOT's other requirements. Any alternatives allowed? How do you bid this item if its not available?

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
