Prebid Questions

Project No. 090226

Sale Date - 4/15/2009

Question Submitted: 11/20/2008

Question Number: 1

MY question refer to the work zone pavement markings section on page 11 of 52. Can you delete the second paragraph? The purpose of the class three or two marking is that 644 thermoplastic can go right over the top of it and not effect the quality of the product. This paragraph has you removing any temporary lines before installtion of the final material. Using current removal methods this would scar the surface of the product you are asking the prime contractor to warranty. In addition due to the speed of the project would you delete all class one work zone markings. Only class three should be used based on the duration of the work involved until the second course or final markings are installed.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
