Prebid Questions

Project No. 080092

Sale Date - 2/1/2008

Question Submitted: 1/23/2008

Question Number: 1

On this Project, the section on SR-168 has Proposal Note 420 Surface Smoothness per plan page 8 of 27, under this Proposal note, the requirements are for at least a 2.25" overlay comprised of 2 lifts. The Type 1 Intermediate course on this job shows 1" (variable) both in the proposed typical sections page 6 of 27, and on the pavement subsummary page 14 of 27. Since this road does not entirely get pavement planed the possibility of less than 1" being laid does exist and therefore at times we could be laying a intermediate course of 0"-1" due to the inconsistent pavement profile. Shouldn't this Proposal note be removed from this project or would the Department add Pavement Planing for the entire SR 168 section.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
