Prebid Questions

Project No. 040453

Sale Date - 7/28/2004

Question Submitted:

Question Number: 1

We have some concerns about reference # 8, - Item 446 - 1" Surface course, Type 1H, APP, PG76-22. Historically it is very difficult to achieve density on a 1" overlay. Normally the lift thickness is 1-1/2 times the nominal top size of the aggregate, which in this case would require a lift thickness of at least 1-1/2" for this surface course.

Per the plan note on page 10/23, the gradation for Item 446 - Asphalt Concrete Surface Course, Type 1H, PG76-22M, APP is decreased per Table 441.02-1, Type 1, Surface Medium. The medium gradation allows a 1" overlay to be placed.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
