Question Number: 4

There is a discrepancy between the traffic signal quantities on p. 183 of the plans vs the proposal notes.

Please clarify.

Question Submitted: 2/14/2006

Question Number: 5

The existing electric lines and telephone lines at the proposed bridge location appear to be at the same grade/elevation as the proposed bridge beams and deck. The 4A note indicates poles will be relocated but does not address the elevation of the lines. Will the utility relocation provide adequate clearance for the bridge to be constructed?

For what duration during what time will the electric lines be de-energized and moved to allow for construction of the bridge?

Will the telephone lines be moved out of the way or will we have to work around them?

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
