Prebid Questions

Project No. 070088

Sale Date - 2/28/2007

Question Submitted: 2/15/2007

Question Number: 1

Is the intent of the 443 Specification to eliminate all limestone aggregates? This question was brought up by our Quality Control Consultant, since meeting the fracture count with aggregates available is not practicable. Slag is not an option due to availability. We are in a quandry as to the material that can be used in this mix. Thank you for your time, we look forward to your response. Steve Schlabach

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
