## Prebid Questions

Project No. 070276

Sale Date - 6/1/2007

Question Submitted: 8/2/2007

Question Number: 1

Bid reference 18 is set up for proof rolling for 3 hours. Typically on smaller jobs, ODOT has allowed the use of a loaded truck or loaded scraper to proof roll the subgrade. In our recent experience with District 5 we had 8 hours of proof rolling that includes small areas of subgrade. District 5 is holding us literally to the 204.06 specification and is insisting that we mobilize a proof roller per this specification. Can we use the common sense approach do proof rolling on this project, or do we need to figure the literal 204.06 specification? Please note that we will have to mobilize a proof roller two times to do this project.

**Please prepare your bid in accordance with the specifications.**

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
