

Ohio Department of Transportation Prebid Questions

Project No. 050406

Sale Date - 7/13/2005

Question Submitted: 7/12/2005

Question Number: 1

In review of the plans for the existing structure provided by the ODOT district office (specifically sheet 5 of 6), the existing pile encasement is shown to be 4' in length with existing pile exposed above and below the encasement. This does not appear to be the case in the field. We cannot tell if the existing structure is built with concrete columns or there is a larger extent of pile encasement. We feel that the contractor is only responsible for removal of the pile encasement as shown in the existing plans (4' per pile).

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
