## Prebid Questions

Project No. 090304

Sale Date - 6/3/2009

Question Submitted:

Question Number: 1

There is no bid item for Tethering 24 x 24 blank onsigns of other existing signs on span wire. There is also no information on Type of Breakaway hardware required.

**The tethering of the LED and flat sheet signs should be included in the ITEM 632 Tether wire, with accessories pay item as described on plan sheet 4. The information on the breakaway tether is shown on SCD TC- 85.21 and described on sheet 4.**

Question Number: 2

There is no bid item for Tethering 24 x 24 blank onsigns of other existing signs on span wire. There is also no information on Type of Breakaway hardware required.

**The tethering of the LED and flat sheet signs should be included in the ITEM 632 Tether wire, with accessories pay item as described on plan sheet 4. The information on the breakaway tether is shown on SCD TC- 85.21 and described on sheet 4.**

Question Submitted: 5/22/2009

Question Number: 3

At several of the intersections, the span wire clamps are very near the tops of the poles. In order to maintain the 16.5' minimum height after the backplates are added, it may be necessary to adjust some of the spans. What would the plan or requirements be if the poles are not tall enough to accommodate the raising of the span? Would the minimum signal heights be waived?

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
