Prebid Questions

Project No. 050019

Sale Date - 1/12/2005

Question Submitted: 1/3/2005

Question Number: 1

there are two different surface elevations shown on the soil boring logs included in the structure foundation investigation (pages 3 and 4). the log for B-1 shows an elevation of 946.7 (in the upper right hand corner) and an elevation of 944.0 (within the actual log). the log for B-2 shows an elevation of 951.6 (in the upper right hand corner) and 949.7 (within the actual log). please clarify which elevation is correct for each boring log.

Question Submitted: 1/5/2005

Question Number: 2

Reference 44 has included the resteel for the drill shafts for Reference 56 & 57. This is a change from the 2000 Specification stating that the resteel for Drill shafts to be included in those items.

Should reference 56 & 57 be marked as per plan and the resteel shouldn't be included these items and reference 44 to remain as the proposal has stated, or should reference 44 be corrected to be 33168 LBS and resteel for the Drill Shafts to be included in reference 56 & 57. Please advise so no doubling may occurs.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
