## Prebid Questions

Project No. 070175

Sale Date - 4/4/2007

Question Submitted: 3/29/2007

Question Number: 1

Included in this project is item 0011 for the installation of a Multi-Seal Surfacing, Type 12 Interlayer. This system has been utilized previously by ODOT. Over the past year the Multi-Seal Surfacing system has been phased out and replaced by a new product/sytem called Fibermat (Fiber Reinforced Bituminous Membrane). We are requesting that the Fibermat system be approved for use on this project as an alternate or approved equal to the Multi Seal System. If an addendum can't be issued allowing the use of Fibermat then we are requesting that after the project is awarded that a change order be initiated which would change the item from Multi-Seal to Fibermat. If you have any questions or need additional information, please contact me. Your cooperation in this matter is appreciated. Doug Perry Terry Asphalt Materials

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
