Will the State consider reducing the 50% work performance requirement by the prime contractor?

Question Number: 4

The bridges we are to work on are specified clearly, but there are several bridges that tie into the specified bridges (ramps). There is no work to be performed on these bridges. If there is work to be performed, ODOT will have to pay for additional lane closures, because the contractor can't guess if there will be work on those additional bridges.

Work is only to be performed where indicated in the plans, no additional bridges. Bid as is.
