## Prebid Questions

Project No. 066009

Sale Date - 4/19/2006

---

Question Submitted: 4/13/2006

Question Number: 1

We have the following questions regarding the instrumentation and monitoring of the drilled shafts.

1. The plans state that the contractor is to supply materials, equipment and labor to assist the Research Team in order to prepare for the instrumentation and monitoring of the landslide stabilization project. What type of materials, equipment and labor will the University require us to supply?
2. The plans state that the instrumentation is a lump sum bid. There is not a reference number for the activity. Please add a reference item for this particular bid item.
3. The plans state that the contractor's schedule should include time for the research instrumentation to be placed, tested and recorded. How much time will the University require to perform their work?
4. Will the University require a storage area or shelter for their work to be performed?

---

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
