Prebid Questions

Project No. 080117

Sale Date - 2/13/2008

Question Submitted: 2/1/2008

Question Number: 1

Reference 17 calls for a quantity of 9640 LF of portable concrete barrier for this project. I believe this quantity is overstated. According to the plans and standard drawings, the northbound lanes would require barrier for STR 16.69 and 16.79 from STA. 8

The ending stations that the contractor lists in his question are not the stations shown in the plans. The plan quantities are correct as shown. The PCB quantity covers areas beyond the bridge where guardrail is being replaced.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
