## Prebid Questions

Project No. 040646

Sale Date - 12/15/2004

Question Submitted:

Question Number: 1

On page 7 of your bid documentation (3rd paragraph) it states that "Portable Trailer Mounted Signals" are not to be used. We manufacture a portable traffic light system that matches and exceeds the features of a "temporary span mounted signal", including light heads that hang over the roadway and conflict monitoring. They just happen to be mounted on a trailer. Could you please inform me of the specifications that would need to be met in order for you to consider using a portable traffic system on this project.

**Trailer mounted signals are not permitted because they do not include luminaires. Before trailer mounted signals would be considered they must include, as a permanent part of the trailer mounted equipment, a luminaire that meets all of the requirements for luminaires as described on Standard Construction Drawing MT-96.21. (The requirements include but are not limited to; luminaire type, mounting height and arm length)**

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
