Prebid Questions

Project No. 070477

Sale Date - 10/12/2007

Question Submitted: 10/10/2007

Question Number: 1

Is it the Department's intent to have the contractor incorporate graded material into the 10:1 slope under Reference 15, Item 209 Linear Grading, or will the contractor be required to excavate and remove all graded material?

Question Submitted: 10/11/2007

Question Number: 2

Addendum #2 clarifies that reference no. 15 item 209 Linear Grading is to be performed prior to chip seal application. Is it the departments intent to pay for reference no. 56 item 617 Shoulder Preparation prior to installation of reference no. 55 item 617 Compacted Aggregate, APP, since this area will have been graded at a 10:1 slope from the milled surface under reference no. 15?

Question Submitted: 9/27/2007

Question Number: 3

Is it the Department's intent to perform item 209 Linear Grading on the shoulders after the pavement planing, at a 10:1 slope from the edge of the milled surface, prior to chip seal application per the plan note listed on sheet 4/67? The linear grading detail on plan sheet 13/67 appears to show this item at a 10:1 slope from the edge of the proposed asphalt concrete surface course, implying that it is to be performed after placing the surface course. Please advise.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
