LINE #0039 AND #0040 YOU STILL INDICATE ASPHALT PAVEMENT THICKNESS AS 9.5MM & 19MM. THE PLANS THANK GOD HAVE BEEN IN INCHES AND FEET FOR MY 60 YEARS AND HOPE IT STAYS THAT WAY. WHY IS THIS STILL SHOWING UP ON PLANS. IT CAN NOT BE POLICY BECAUSE EVERYTHING BUT THIS ON THE PLANS IS IN INCHES OR FEET. SHOULD THIS NOT BE CORRECTED? THANK YOU,

**From Section 405 of the ODOT Pavement Design Manual: "Pay item descriptions for superpave items contain a reference to the nominal maximum aggregate size used in the mix. Accordingly, the 9.5mm, 12.5mm, and 19mm designations are used for superpave mixes. This reference to the nominal maximum aggregate size replaces the reference to Type 1, Type 1H, and Type 2, respectively, used in non-superpave specifications, has nothing to do with any other measurement, and is used in English and metric plans."**
