NOTES:

1. 1/2" preformed joint filler as per C&MS 705.03 shall be used between pole and adjacent paved areas.

2. A 6" thick work pad with dimensions shown on details shall be provided unless in an otherwise paved area. In level areas, the top of the pad shall be 1" above the ground line. In steeply sloped areas (3:1 or steeper), the pad's design shall be adjusted to provide access, drainage, and safety, as approved by the Engineer. (Refer to SCD ITS-50.2 for Sloped Work Pads.)

3. For areas with less severe slopes (3:1 or less), grading or earthwork is preferred.

4. For pole-mounted ITS cabinet, the mounting height shall result in the bottom of the cabinet to be 30" above the work pad.
