

**Ohio Department of Transportation
Office of Traffic Engineering
January 21, 2011 TEM Revision**

To Holders of the ODOT Traffic Engineering Manual (TEM):

As of January 21, 2011, Parts 2, 3, 4, 6, 8 and 11 of the TEM have been revised.

The on-line copy of the TEM has been updated. A separate revision package for updating a current TEM is available from the ODOT Design Reference Resource Center (<http://www.dot.state.oh.us/drrc/>), or from the Publications/Documents link provided on the left side of the Office of Traffic Engineering Home Page (<http://www.dot.state.oh.us/traffic/>).

The TEM Revision package is set up to print double-sided sheets. The pages should be printed and inserted into your manual by page number. For this revision, the Revision Set includes individual page changes to be inserted into the manual.

Per ODOT policy, paper copies of the publications are no longer distributed to all holders. Revisions will only be available via the web pages noted above.

Juanita Elliott, P.E., Traffic Standards Engineer or
(614-644-8143 or Juanita.Elliott@dot.state.oh.us)

Lisa McConnell, Traffic Standards Technician
(614-728-9361 or Lisa.McConnell@dot.state.oh.us)

Intentionally blank.
