

Historic Bridge Inventory:

2. ODOT will maintain the *Ohio-DOT Historic Bridge Inventory Database* (originated in 1981 and updated in 2010). A copy of the database will be forwarded to SHPO and FHWA on a semiannual basis; and also made available to the public through ODOT's website. The database will be forwarded to ODOT-IT and Office of Structural Engineering for inclusion in NBIS, BMS and ODOT's buckeyeassets.org website (or their successors); on a semiannual schedule.

Ohio Department of Transportation

Historic Bridge Inventory as of May 2014

The inventory currently indicates that there are about 500 total historic bridges in the state in the following two categories:

National Register 122 bridges listed in the National Register of Historic Places
(120 bridges were recorded in the 2010 bridge update)

Eligible 378 bridges are inventoried as Eligible for the NRHP
(386 bridges were recorded in the 2010 bridge update)
