

Traffic Calming for Active Transportation eLearning Course

This course presents the concept of traffic calming as it pertains to active transportation facilities and users. The purpose of this course is to introduce the principles of traffic calming, to become familiar with various types of safety countermeasures, and to learn about the resources and tools available to inform the planning and implementation of traffic calming countermeasures.

Upon completion of this course, participants will have the knowledge needed to determine if traffic calming countermeasures are an option for them to further explore for implementation in their community.

They will:

1. Understand why communities are looking to make their streets safer;
2. Be familiar with technical tools for making streets safer;
3. Possess practical knowledge of how to start planning and funding safety countermeasure projects; and,
4. Apply the knowledge to their community.

The course is now available through Ohio LTAP's eLearning. The course takes 1.5 hours to complete. The course is available at no cost. Please

follow the instructions on the next pages to setup your account (if you don't have one already) and then take the course.

This course is part of the Active Transportation Academy (ATA) which provides training, workshops and implementation programs to communities throughout Ohio. We offer active transportation training on programs, projects and policy that can help your community reach its active transportation goals. For more information on ATA, please visit the program's webpage at: [ATA Website](#). To access the training directly, please see page 7 or visit the [LTAP eLearning webpage](#).

How to Obtain a MyODOT Account for LTAP eLearning

In order to complete the eLearning module, you will need to have a MyODOT username and password. MyODOT accounts are specific to a person, so please do not share your username and password with anyone else.

When you request the username and password, it is not an automated process. We have a real person who approves each and every account, so please don't wait until the last minute. We recommend you request your MyODOT username and password as soon as possible.

Once your account is active, make sure to save your MyODOT username and password in a safe place. If you lose your information, your password can be reset, but that is another process and takes more time. Save the information in a safe place so you will have it in the future.

Steps to request a MyODOT Username and Password:

1. From your internet browser, go to the following website:
<https://myodot.dot.state.oh.us//ssl/Main.aspx>

2. In the box in the middle of the page, under “What would you like to do today?” click the “Click here” link next to “I need to request a Basic.”

What is MyODOT
MyODOT is website that allows individuals to request a web account (user ID and password) that allows them to access many systems within ODOT that require login credentials.

The types of MyODOT accounts that may be requested are:

Primary account
A primary account owner is the person who creates the first MyODOT account on behalf of an organization or business and uses that account as their personal account for accessing applications within ODOT. As a Primary account owner for an organization this person can create Secondary accounts for specific applications within ODOT. Primary accounts must be approved by authorized ODOT personnel.

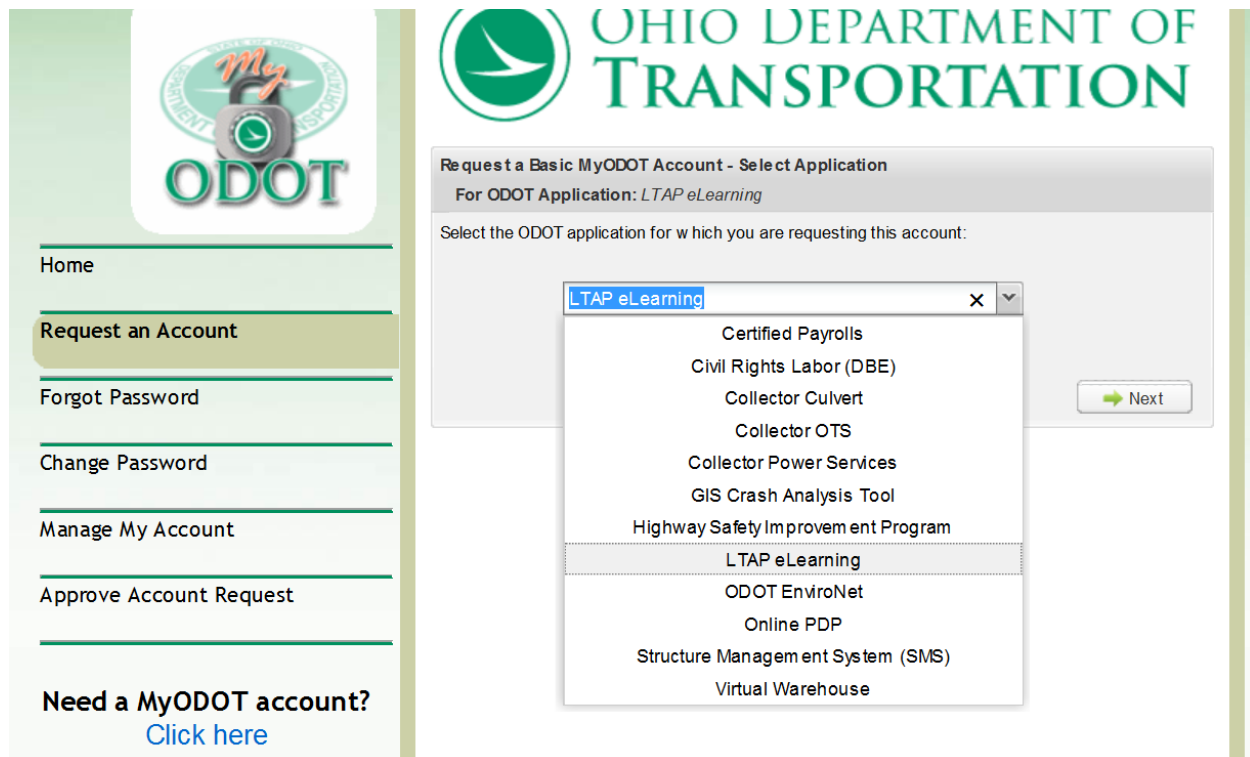

Secondary account
For those organizations that have multiple individuals who need access to ODOT applications, i.e. subcontractors working for a primary contractor, ODOT offers a Secondary account. Secondary accounts are created by designated Primary account owners.

Basic account
Individuals that are neither Primary account owners or Secondary account owners may request a Basic account. This will be their personal account for accessing systems within ODOT. Basic accounts must be approved by authorized ODOT personnel.

- When the system logs you in, click on the "Course Catalog" tab at the top of the page. (see image below)

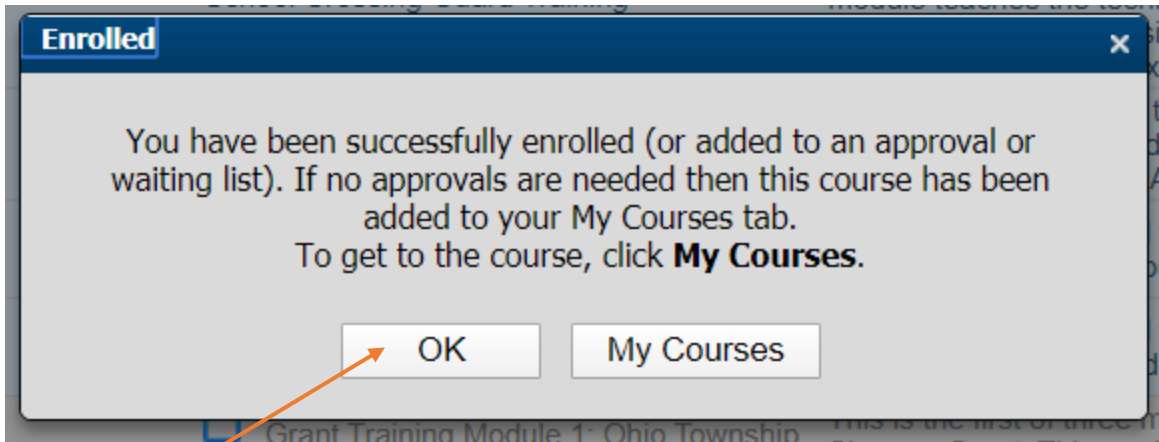

- Then scroll down and find the Traffic Calming module you want to complete. Click the "Enroll" button to the left of the module's name.

- A box will open on your screen asking you if you want to enroll for the selected item. Click the "Yes" button.

- Another box will then open on your screen notifying you of your enrollment into the course. It tells you to go to the "My Courses" tab. Click the "OK" button to close this box.

8. After the box closes, scroll back to the top of the page and click on the "My Courses" tab at the top.

9. Then find the module you selected in your list of available courses and click on the arrow image at the left side of the course name to launch your eLearning module.

10. The course will open in a new screen on your computer. Please follow the instructions in the course to complete the training. If you need to stop and restart, the course will already be in your "My Courses" tab the next time you go to access it.
