Ohio Roundabouts
Conference

Friday, September 13, 2019
Newark, Ohio

Roundabouts have grown in popularity in Ohio and across the nation due to their tremendous safety benefits for roadway users. Ohio LTAP is hosting a 1-day conference to bring together transportation planners, design engineers, elected officials and others involved with current or future Roundabouts in their communities.

The conference will feature presentations on:

- Driver Understanding of Supplemental Yield Pavement Markings at Roundabouts
- Roundabouts and Public Involvement – a Panel Discussion
- Roundabout Design Composition for Multimodal Safety & Operations
- Local Roundabouts in Pennsylvania
- Right Sizing Roundabouts for Large Vehicle Traffic
- Solving Safety & Congestion Issues with Roundabouts
- Roundabout Capacity: How Much is Enough?
- and a keynote, national update presentation by Hillary Isebrands, Roundabouts Expert from the Federal Highway Administration (FHWA).

Lunch includes time to participate in a self-guided walking tour of Newark’s Circles on the Square - Mini-Roundabouts in the Central Business District.

To learn more about Roundabouts and their safety benefits, please visit the FHWA resource website available at this link.

Address: Midland Theatre, 36 N Park Pl, Newark, OH 43055.

Audience: Local, state and federal agency employees, consultants, contractors and others involved in planning for, installing or maintaining roundabouts are encouraged to attend. Attire is business casual.

Cost: Attendees will only be responsible for the cost of lunch (on their own) and any travel costs incurred for the day. There is no charge to attend the conference itself!

Continuing Education Credits: 5.0 contact hours for all day attendance.

Registration deadline is Tuesday, September 10th. Register online by clicking HERE.
