The data presented below and throughout the graphs represents all statewide crashes between 2007-2016 that have occurred between a motor vehicle and a horse drawn Amish buggy. Single buggy crashes were excluded in this analysis in order to see the crash trends that occur between motor vehicles and Amish buggies only.

Some quick facts are listed below:

- 1,412 Total crashes (0.05% of statewide total) between 2007 and 2016
- 25 Fatalities and 208 Serious injuries (0.23% and 0.22% of statewide total) between 2007 and 2016
- Nearly two-thirds (65%) of all crashes occurred during daylight.
- 78% of all crashes occurred on dry roads.
- 41% of the at-fault vehicles involved were traveling straight (includes vehicles performing a pass).
- 57% of all crashes happened on straight and level roadways.
- 76% of all crashes occurred at non-intersection portions of Ohio roadways.
- The most common crash type was sideswipe-passing crashes, accounting for 52% of all crashes statewide for the past ten years.

Districts 3, 4, 11 and 12 combined accounted for 78.9% of all statewide crashes which is where the Amish predominantly live and travel.

- District 3: 31.0%
- District 11: 22.6%
- District 4: 12.7%
- District 12: 12.6%

For more detailed information, refer to the charts on the following pages. Also, an ODOT map is included that displays the Districts and Counties since they are referred to in many chart.
*This displays the highest crashes per county in Ohio accounting for 90% of all total crashes. The small remainder of crashes occurred in other counties.*
