

## Supporting Coordination across State Agencies and their Stakeholders

The Ohio Mobility Management Program supports connections between transportation and human services, education, and employment. Transportation options for individuals can result in improved health conditions, reduced costs related to workplace absenteeism, and cost savings for medical providers attributed to missed appointments.

Mobility managers can:

- Work with Federally Qualified Health Center staff to identify transportation options for Medicaid patients.
- Provide professional development to educators and travel instruction to youth to support their transition to jobs, college, and the community.
- Establish partnerships with medical and health care providers to explore mobility innovations to ensure access to health care.
- Support the identification of transportation options to improve access to employment.
- Explore opportunities to write grants and procure funding to support mobility innovation.

OHIO DEPARTMENT OF  
TRANSPORTATION

**Ohio**  
Mobility  
Management

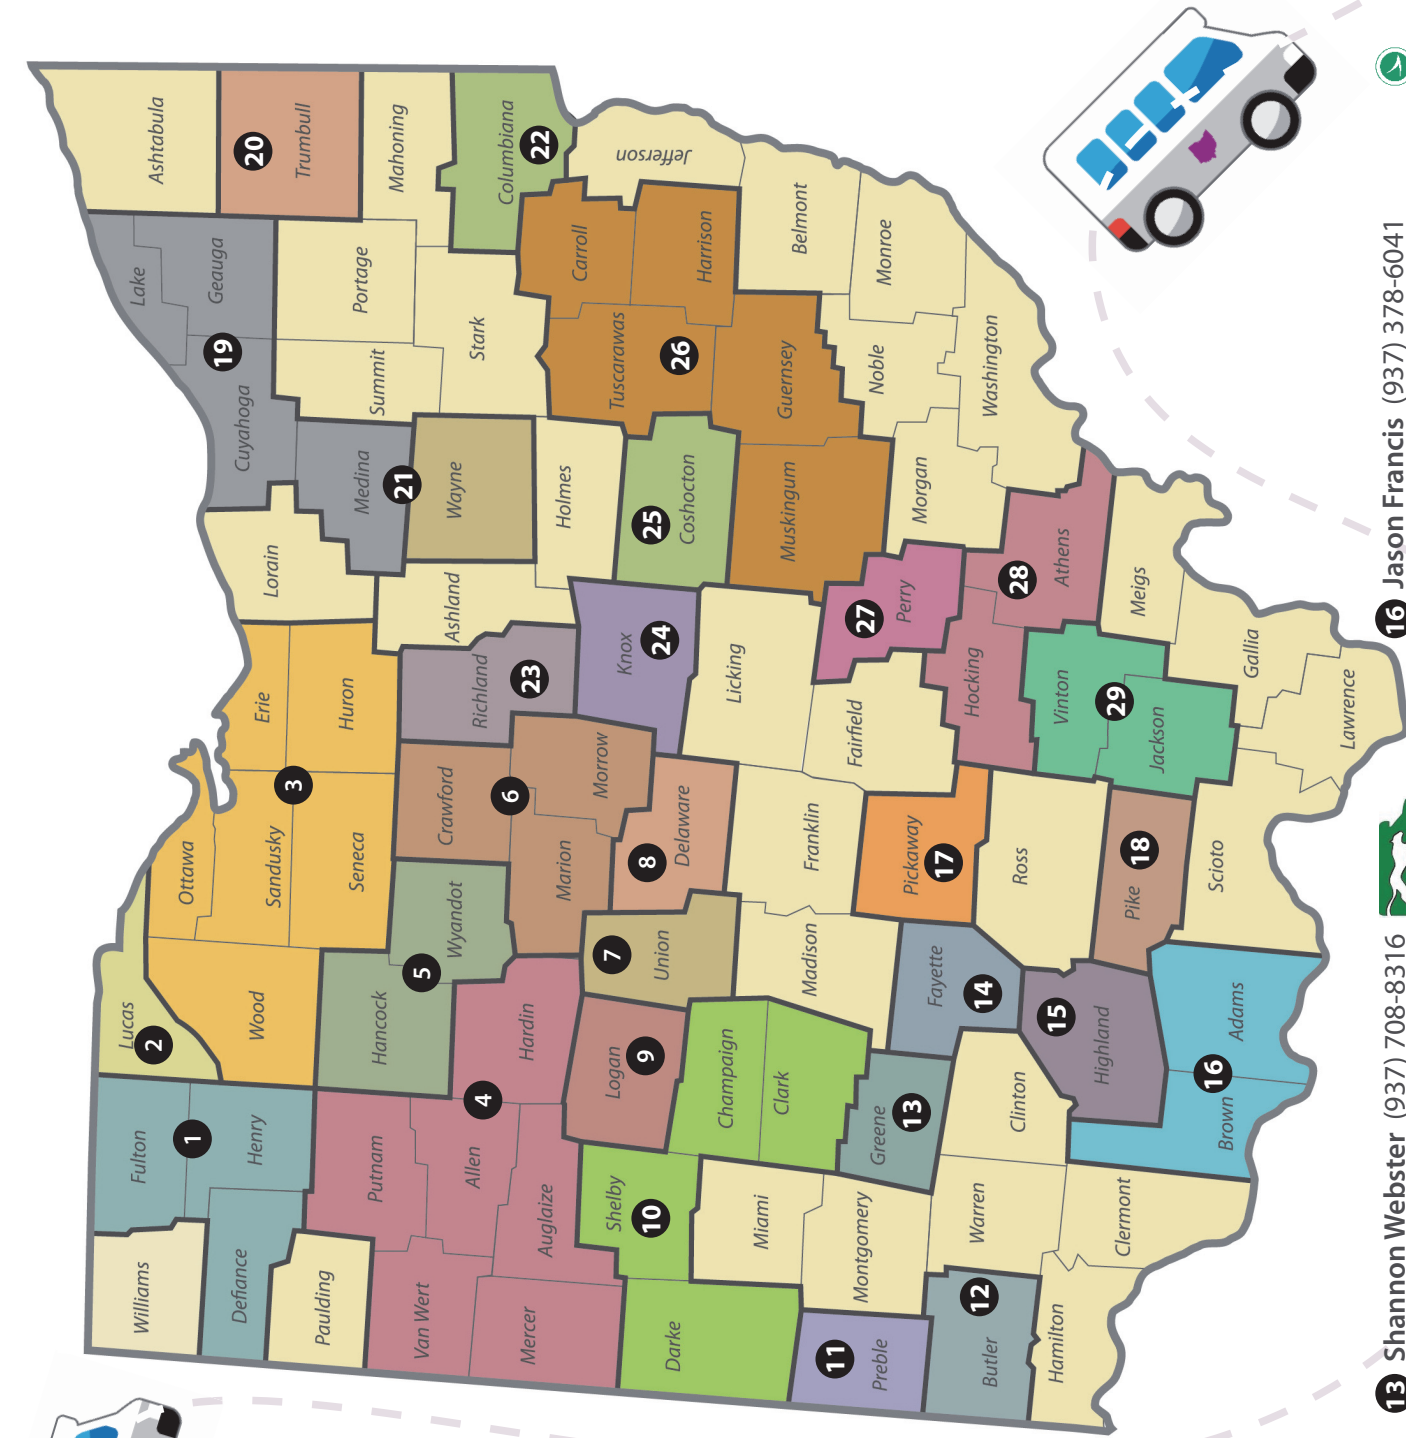

People living in both rural and urban areas may have difficulty accessing transportation options. For older adults and people with disabilities, who may not be able to drive or even have access to a car, getting around can be a challenge. Simple errands that others take for granted, like traveling to an appointment, can be difficult or near impossible. Lack of reliable transportation can affect an individual's ability to access community settings such as a job, school, grocery store, or a medical appointment. The Ohio Mobility Management Program includes a diverse group of professionals across the state that help increase mobility options through free services. The Ohio Mobility Management program and its mobility managers have the following goals:

- increases access to mobility for Ohioans by increasing understanding and awareness of transportation needs
- coordination of transportation options to meet needs
- and building sustainable and healthy communities by integrating transportation into planning and programs.

**Contact your local mobility manager to get started!**
