Subject ARRA Updates - Addendum

Dear ARRA Funding Recipient,

We apologize for having to send another update out so soon but one new, very recent update has been brought to our attention. Projects involving structures (specifically bridges) must be inspected for asbestos as per Ohio law (more information at <http://www.epa.state.oh.us/dapc/atu/asbestos/asbestos.html>). These structures must be inspected by a licensed OEPA Asbestos Inspector, and the Ohio EPA Notification of Demolition and Renovation form needs to be completed by the Inspector for each structure and forms supplied by the Inspector for each structure will need to be included in the final project plan package . This form must be completed and submitted 10 days prior to work beginning on the structure .

If you have any questions please do not hesitate to call or email us . Thank you again.
