Interstate 75/475 Interchange Upgrade Project

Project Description: Built in the late 1960's, the current Interstate 75/475 interchange has outgrown the current design. The I-75/I-475 Interchange Upgrade project will modernize the interstate systems interchange in Toledo, reconstruct and rebuild the Douglas Road ramps and build a new interchange at ProMedica Parkway, making the Central Toledo area more easily accessible.

General Information:

- Construction Timeline: 3 Year Project - August 2010 – Fall 2013
Majority of work complete in late 2012 - Resurfacing and bridge painting in 2013
- Project cost : \$63,881,939.77
- Contractor: E.S. Wagner, Oregon, Ohio

Key Improvements:

I-75/I-475 Interchange Upgrades – The project reconfigures the current interchange by adding lane capacity to the ramp from southbound I-75 to westbound I-475 and the ramp from eastbound I-475 to northbound I-75. These new lanes on the ramp will be accessible *once the future Interstate 75 project is complete*.

ProMedica Parkway – New interchange will allow for easy accessibility to and from I- 475 from ProMedica Parkway.

Widen I- 475 – Increase the number of lanes in certain areas along I-475 in both directions from Rushland Avenue to I-75.
