

Potholes are a common nuisance, particularly during the winter season when the freeze/thaw cycle helps weaken the pavement. Roadways with a high volume of traffic are particularly prone to develop potholes.

A motorist should ONLY report a pothole or damage from a pothole to the state if the pothole is on a statemaintained roadway. State maintained roads include all interstates and state and U.S. routes in unincorporated municipalities, such as villages or townships.

Please call the appropriate county and give them the specific location in order that they can initiate the repair and answer any other questions you may have:

Ashtabula: 786-4971

Mahoning: 786-4962

Portage: 786-4926

Stark: 786-2280

Summit: 786-4902

Trumbull: 786-4987

If a motorist encounters a pothole on a state or U.S. route in a city or other incorporated municipality, he or she must contact the city or governing authority directly.
