ODOT Announces 2018 Structure Maintenance project in Mahoning County

Structure Maintenance along State Route (SR) 534 in Berlin and Goshen Townships Mahoning County

The Ohio Department of Transportation (ODOT) proposes structure maintenance (concrete bridge deck replacement, concrete patching/sealing, etc.) for five structures along SR 534 between the Columbiana County Line and U.S. Route (USR) 224. The $640,000 project is scheduled to begin construction in the spring of 2018.

A minimum of one 10-foot bidirectional lane of traffic shall be maintained at all times along SR 534, except when necessary to close/detour SR 534 for a maximum of sixty consecutive days to replace the concrete deck of a bridge located in proximity to W. Calla Road. The official detour route for this bridge closure will utilize USR 224 and SR 14. Construction, lane restriction, bridge closure and detour information will be posted along SR 534 and on the ODOT District 4 webpage, www.transportation.ohio.gov/dist 4, prior to the start of project construction. Access shall be maintained to all intersecting roads and adjacent properties at all times during project construction.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by ODOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated [December 11, 2015], and executed by FHWA and ODOT. The proposed project will not impact any cultural resources, suspect hazardous waste sites or result in any substantial impacts to ecological resources. The project will not result in any impacts to the environment either individually or cumulatively. In compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (codified as 36 CFR 800), ODOT requests information regarding the presence of any known cultural resources in the vicinity of the project. Cultural resources include prehistoric and historic archaeological sites, historic bridges, historic buildings, sites and districts.

To ensure the proposed project is viable and successful, ODOT is seeking comments from the public about the social, environmental, and economic impacts of this proposed project. Environmental impacts include those involving archeological, architectural and ecological resources, regulated materials and the general location of the project. Any comments you
may have regarding the environmental and/or the proposed project may be submitted by November 29, 2017.
