EXHIBIT A – TEMPLATE OF PUBLIC EXPLANATION TO BE POSTED (TO BE COMPLETED BY THE DOCUMENT PREPARER)

SUMMARY OF FLOODPLAIN IMPACTS

Date: ____________________________

2/28/2018

Project ID: _______UN1-CR340B-2.46_____

Floodplain Affected: _______Rush Creek_____

Description of Project: 

Bridge Replacement

Why must this project be located in the Floodplain?

The bridge carries a road that crosses the floodplain and creek.

What alternative sites were considered, if any?

None.

Were any mitigation measures utilized on this project? If so, please describe.

A Hec-Ras model was developed to assist with the design of the bridge and approach roadways such that the project will not increase the 100-yr. floodplain.

To the best of my knowledge, this project has complied with all applicable Local, State, and Federal Floodplain protection standards.
