

HOW WE KEEP YOU MOVING *DURING CONSTRUCTION*

LANE CLOSURES ONLY PERMITTED AT CERTAIN TIMES

- Lane and ramp closures are permitted during off-peak times - the specific timeframe depends on the number of lanes closed and traffic volumes on the ramp or on that section of roadway
- Daytime lane and ramp closures are permitted in some locations between 9 AM and 3 PM, depending on traffic volumes
- All lanes and ramps are open by 5 AM on weekdays
- Every effort will be made to provide prior notification of lane closures on I-71

COORDINATION WITH LAW ENFORCEMENT/TOW COMPANIES

Because this stretch of I-71 is already congested, the contractor has been advised that they must work with local law enforcement, emergency responders and wrecker services to clear lanes as quickly as possible after an accident or a disabled vehicle is stuck in a travel lane. This could mean removing some barrier wall temporarily to provide emergency responders with easier access or using flaggers to move traffic through the area. The intent is to minimize extended travel delays.

MAKE SURE YOU HAVE THE OHGO APP

- Download the app at www.ohgo.com/app
- Current traffic impacts - planned roadwork or unplanned closure due to a crash, real time traffic speeds and cameras
- Set your route and typical travel times in the app and OHGO will send you personalized notifications when your route is impacted

CONSIDERING ALTERNATE ROUTES & FLEXIBILITY AT WORK

- Use I-270 or US 23 to avoid the work zone completely
- Allow for extra travel time on I-71 between Grove City and Downtown, especially during morning and evening commutes
- Adjust your work schedule if possible
