

ODOT Project 361-11

Dayton ITS/FMS

Update February 5, 2013

The Dayton ITS/FMS Project is nearing completion with anticipation all components be up and available on www.buckeyetraffic.org late spring 2013.

All infrastructures are in place at this time. We are currently working with AT&T in connecting communications to all devices which include the following:

56 each permanent CCTV IP Cameras on 70' (51 each), 80' (4 each) concrete poles and 1 each on top the Montgomery County Building on Third Street. Some of these are replacing existing cameras from early deployment project 2008.

4 each new Dynamic Message Signs (DMS), 3 each already in service along with 5 each existing "DMS" from early deployment project 2008 and are available on www.buckeyetraffic.org . Total of 9 each DMS.

4 each existing Highway Advisory Radio's (HAR's) are available by the web site and FM radio station 1630 and 1700. 1 each to be added by this project this spring, for a total of 5 each "HAR's".
