Ohio Department of Transportation - District 9

2017 CONSTRUCTION PROGRAM

(FY2017-2022 WORK PLAN)

Ohio's highways are essential to keeping and creating new jobs. With a mission to provide easy movement of people and goods from place to place, the Ohio Department of Transportation (ODOT) is responsible for maintaining one of the largest transportation networks in the nation. Guided by ethical principles and accountability, ODOT works to improve safety, enhance travel and advance economic development. As a \$2 billion enterprise, the department wisely invests in its core services of snow and ice removal, annual construction program and highway maintenance operations.

The following **DRAFT** summary outlines those projects which are being programmed or considered for construction through the 2017 calendar year in ODOT District 9. Included in this summary is the draft Fiscal Year 2017-2022 Work Plan, which outlines projects that have been programmed or are under consideration for construction in the District 9 area.

Due to production and planning variables, however, not all projects may be sold as proposed. Any cost estimates or sale dates cited in this document are subject to change. Additional information about these and other construction or maintenance projects will be released as they are scheduled or awarded. For more information, please contact the District 9 Offices at 740-774-8834 or email d09.pio@dot.state.oh.us.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for these projects are being, or have been, carried-out by ODOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 11, 2015, and executed by FHWA and ODOT.
