

Project Purpose and Need:

The purpose of this project is to improve the function and safety of the Pike, 7th, and Greene Street intersection.

The project goals are to improve the level of service, mitigate crashes, improve pedestrian access, and maintain functional access to local streets and businesses. This safety project will build upon the improvements that are currently being made throughout the Pike Street Corridor.

On June 12, 2009 the Ohio Department of Transportation approved funding for safety improvements at the intersection of Pike, 7th, and Greene Street.

Project Schedule:

- Public Meeting — February 16, 2010
- Public comments due — March 2, 2010
- Project Sale — Winter 2012
