

2017-2018

WINTER READINESS

DISTRICT 11 STATS

- 124 snow plows
- 200+ drivers
- 19 mechanics
- Used 47,301 tons of salt last winter
- 3,577 treated lane miles
- Workers drove 604,585 miles removing snow & ice last winter
- Avg. salt price per ton: \$43.05

Each year, ODOT prepares for snow and ice through its robust and comprehensive Winter Readiness Program that focuses on four components of snow and ice control, including:

PEOPLE

We train our drivers in the latest snow and ice removal concepts to ensure they are “game ready” before the first snowflake falls.

EQUIPMENT

Our mechanics implement a 150+ point inspection on all our snow-fighting equipment.

MATERIALS

We ensure all of our snow and ice melting materials such as salt, brine and other materials are stocked full.

WEATHER

We stay ahead of the game by using the latest weather tracking technology and radar systems.

www.OHGO.com | www.OHGO.com/app

ODOT’s premier traffic Web site features winter road conditions and real-time traffic information for desktops & laptops.

The OHGO mobile app is available for smartphones, featuring personalized traffic alerts and hands-free voice on the go.

The OHGO logo, consisting of the letters "OHGO" in white on a green speech bubble background.
