

OHIO'S JOBS & TRANSPORTATION PLAN

More Projects - Faster.

\$3 Billion Over Six Years

The Ohio Jobs and Transportation Plan

Gov. John R. Kasich's Jobs and Transportation plan injects nearly \$3 billion in state, local and federal, and Turnpike money into 41 transportation projects across the state. These needed funds erase delays and accelerate most construction projects by more than 10 years.

By the Numbers

- 41 – The number of projects throughout Ohio recommended for construction that could improve motorist safety, reduce congestion, add capacity and improve our economy
- \$2.9 billion – the total investment made in the state's infrastructure using a combination of state, local and federal funds
- A breakdown by region:
 - \$1.2 billion – the amount of money spent on 17 projects in Northeast Ohio
 - \$932 million – the amount of money spent on 9 projects in Central/Southeast Ohio
 - \$494 million – the amount of money spent on 10 projects Northwest Ohio
 - \$286 million – the amount of money spent on 5 projects in Southwest Ohio
- 30,000 – the number of jobs created for every new \$1 billion spent on transportation
- \$1.5 billion – the investment the Ohio Turnpike and Infrastructure Commission is making in Ohio's transportation system
- 100 – the percentage of Turnpike funds spent Northern Ohio
- 13 years or more – the reduction in future delays for most of the projects

Saving Motorists Time and Money

- \$52 million – the amount of money saved by motorists who are sitting in traffic in areas improved by these construction projects
- \$92 million – the amount of money saved by motorists when congestion causing crashes and unscheduled vehicle maintenance are reduced or eliminated in areas improved by these construction projects
- 10.5 million – the number of gallons of fuel saved annually by reducing the amount of time motorists sit in traffic where these projects are located

ODOT Innovation

The Ohio Department of Transportation (ODOT) is in the process of streamlining operations, improving efficiency and identifying unique ways to provide the same great service taxpayers deserve at a much lower cost. Here are just a few of the items that could save or generate millions of dollars each year:

- Workforce reductions through attrition only
- Modernizing Ohio's rest areas
- Improving the way salt contracts are negotiated
- Sponsorships, advertising and naming rights of key ODOT assets
- Public-private partnerships
