LOOKING BACK: THEN & NOW

Two summers ago, it was all about demolition and moving dirt. Today, the men and women of our construction crews are putting the final touches on the I-71/I-670 Columbus Crossroads. Take a look at how far we've come.

Looking north from Spring Street.

Back in 2012, it was all bulldozers, cranes and dirt when you looked north from Spring Street at the construction zone. Today, the major structures and new lanes of the redesigned I-71/670 interchange are fully operational and moving traffic far more efficiently.

Looking north at the Cleveland Ave I-670 overpass.

Cleveland Avenue in 2012 was marked by piles of dirt and steel piles being driven to support the future I-670 overpass. Today, three bigger, better bridges span this busy city street and
wider sidewalks make the area near Columbus State Community College and Fort Hayes easier to access. Attractive bridge treatments make this an inviting gateway to the area. The public selected the color scheme and bridge treatments at a public meeting in 2011.

*The Long Street bridge before demolition and today.*

In 2012, the old Long Street Bridge stood as it had since its first day, flanked by chain link fencing. Today, the Long Street Bridge boasts a wide, park-like pedestrian walkway on both sides and will soon be home to the much-anticipated Long Street Cultural Wall. And speaking of the Cultural Wall.

YOU’RE INVITED!!!!!!
Get the 4-1-1 on Traffic!
