

Vitrified Clay Pipe, Standard Strength

Qualified Product List Specification - Requirements

ODOT Construction and Materials Specifications 706.08

Requirements for inclusion on the Qualified Product List

Submit to the Office of Materials Management the following information:

1. Manufacturer's letter certifying the vitrified Clay Pipe supplied to the project will meet or exceed Departmental specifications for Standard Strength and include:
 - A Provide certified test data on the pipe showing compliance to materials requirements.
 - B A quality control plan including:
 - (1) Testing frequency per production run
 - (2) Methods for assuring non specification material is not shipped out
 - (3) Typical product markings on the pipe.
 - (4) Dimensional inspection frequency and what is checked
 - C Initial sample of two (2) pipe sections, each, of any extra strength diameter for both perforated and non perforated.
2. Agreement to immediately notify the Department on any changes in production, materials, dimensions, before shipment.
3. Provide the Department a contact name, number and e-mail address
4. Provide re-certification documentation and samples by January 1 of each year

Acceptance by the Department

The Office of Materials Management will review a manufacturer's submittal for compliance with specification requirements and will evaluate any pre-qualification samples.

Accepted products will be listed on the Department's qualified product list web page and will be loaded into the Department's Construction Management System for acceptance in the field through the QPL screen.

Field Documentation requirements

Products on the QPL will be accepted if they can be identified by the field to a supplier/manufacturer listed on the Department's Qualified Products List
